

MiruGas®

Process monitoring
and analysis service

Optimise the productivity of
your processes supplied by both
compressed gas and liquid.

- 1 **Data collection** through specific sensors for each manufacturing process.
- 2 **Data processing** to adapt them to each process or factory.
- 3 **Visualisation** of information in the environment developed by Nippon Gases.

Control of process parameters

MiruGas® allows Nippon Gases specialists to advise you to improve and better understand the Food and Beverage industry.

Real-time display and access to history of all monitored data.

- Flow rates and working pressures.
- Quality of the gas consumed.
- Room temperature and humidity.

**NIPPON
GASES**
The Gas Professionals

Monitoring service and
process analysis
